

Ready to see Aplos NCA in action?

Let's talk Data Cleaning! Make Your PK Data Analysis-Ready in Minutes

A screenshot of the Aplos NCA Data Cleaning web application. The interface is divided into several sections. On the left, a sidebar contains navigation icons. The main area is titled "Data Cleaning" and includes a sub-header "Perform data cleaning operations on uploaded files". Below this, there are input fields for "Source File" (containing "pk-study-01.csv") and "Output File Name" (containing "pk-study-01-cleaned.csv"). A section titled "Data Cleaning Rules" shows a list of 4 configured rules, including "Add Column", "Find & Replace", and two "BLQ" rules. To the right, a "Configure: Add Column" panel allows users to set parameters for a new column, such as "Description" (Add treatment column), "Column Name" (Treatment), and "Default Value" (10 mg Drug ABC-123). A green "Clean Data" button is located in the top right corner of the configuration panel.

Key Features:
